LinkedIn: linkedin.com/in/prachi05   Phone No. : +91 9350230755

PROFILE

Python developer with a proven track of designing and implementing web applications and data-driven solutions. Proficient in utilizing Django frameworks to create efficient and scalable backend systems. Data analysis and manipulation using Pandas and NumPy, with a understanding of SQL databases. Passionate about staying updated with industry trends and best practices, and committed to delivering high-quality code. Seeking a role that allows me to leverage my technical expertise and collaborate with a dynamic team to create innovative solutions.

TRAINING

Excellence Technology(Educational Institute)
Sahibzada Ajit Singh Nagar, Punjab

-Versed python frameworks and libraries

EDUCATION

Bachelor of Technology (CSE)
Maharashi Dayanand University, UIET, Rohtak

- Programming Languages
- Data structure
- Problem-Solving

12th Standard (Non-Medical)
Pathania Public School, Rohtak

- Mathematics
- Chemistry
- Physics

PROJECTS

Real Time Chat App
- Web application using django framework with interactive Frontend.
- Use to send and receive messages in real time.
- Online Chat Application can lead to error free, secure, reliable and fast management system.
- https://github.com/PrachiPanwar05/Real_time_chat_app

Login – Signup
- A signup page is created so user can register for new account and a login page so that user can login to their current account.
- The Django auth app provided us with built-in url and views for login and logout. All we needed to do was add a template for login. But to create a sign up page we will need to make our own view and url.
- With python using django framework.
- https://github.com/PrachiPanwar05/Login_signup-

CRUD Operations

- CRUD operations (Create, Read, Update, and Delete) are the fundamental functions used to manage data in software applications.
- These operations allow developers to create, read, modify and delete records from a database or file.
- https://github.com/PrachiPanwar05/CRUD-Operation

Rock_Paper_scissor Game

- The object of the rock-paper-scissor python project is to build a game for a single player that plays with a computer, anywhere, and anytime.
- This project is base on the rules that: rock blunts scissors so rock wins, scissors cut the paper so scissors win.
- Using Tkinter library
- https://github.com/PrachiPanwar05/Py_game

Linear Regression

- Data analyzed of USA housing for predicting house prices.
- By gathering and preprocessing relevant data, building and fine-tuning the model, and evaluating its performance, we can develop a valuable tool for the real estate industry.
- Using Numpy, Pandas, Matplotlib
- https://github.com/PrachiPanwar05/linear_regression

Sending Mail

- Using SMTP (simple mail transfer protocol) with django framework
- Your email server or client uses it to send messages to other servers.
- SMTP helps prevent spam by verifying the sender's account before delivering an email.
- https://github.com/PrachiPanwar05/Django_Mail

TECHNICAL SKILLS

- PYTHON
- SQL
- C programming
- Django
- Flask - Basic
- Numpy
- Pandas
- Matplotlib
- MySQL
- Data Structure
- HTML
- CSS
- OOPs
